

# Commercial Plastics

Company Presentation **2023**

# Who we are today

- A full-service plastic products manufacturer
- Family-owned business with roots going back to **1940**
- Approximately **700** employees
- **5** manufacturing sites - Illinois, Wisconsin, Nebraska, Minnesota, & Monterrey, MX
- ISO 9001:2015 Certified Facilities
- **240** molding machines - high pressure up to 3300 tons and structural foam up to 1500 tons
- **1,050,000** sqft of manufacturing and warehouse space

## Who we work with

# Industries

## AEROSPACE

With over 125 mold inserts, sequential valve gate systems and six axis Fanuc robotics, we produce tip mandrels for duplicate inlays for commercial airline engines utilizing our 2000-3000 tons machines.

## APPLIANCE

For more than 40 years, Commercial Plastics has been utilizing start-of-the-art automation for highly cosmetic products for the Appliance Industry.

## LIGHTING

We produce LED luminaries and housings for energy efficient lighting. We use high-performance polycarbonate providing lighting manufacturers with a way to develop products that meet high technical requirements.

## PLUMBING, HEATING & HVAC

We produce durable PEX products for plumbing, radiant heating and cooling with high temperature, high performance ultra-stable polysulfones polymers.

## AGRICULTURE

We produce molded-in color critical components, seating, and housings for the leading agriculture companies using structural foam low pressure molding and 3300-ton machines.

## HEALTH & FITNESS

We produce heart rate monitoring housings, cup holders, end caps, and motor housings that go onto treadmills, elliptical, and exercise bikes.

## MEDICAL & HEALTHCARE

We produce sharps containers for hazardous waste disposal and management. Utilizing the latest technology with in-mold labeling and sequential bar-coding, we developed automation to meet the demands of the Medical and Healthcare industry.

## POWER SPORTS & RECREATIONAL

We produce components, covers, fenders, and seating for the leading outdoor power sports and recreational companies. We have extensive engineering experience meeting the demanding requirements for quality and logistics.

# Where we are

**MORA, MN.**  
450,000 sqft.

**KENOSHA, WI.**  
170,000 sqft.

**WAVERLY, NE.**  
170,000 sqft.

**MUNDELEIN, IL.**  
125,000 sqft.

# Our newest facility - Monterrey

Monterrey, Mexico Facility

180,000sqft

**Monterrey (Apodaca), N.L.**

*Camino a los Fernández No.700, Misión de San Javier, 66646 Cd Apodaca, N.L. México.*

**IMMEX  
AAA**

# Our Expertise

September 14, 2023

## Large Part Molded-in Color

# Structural Foam Low Pressure Molding

## Complex Assembly & Large Part Molding

## Large Part Gas-Assist Molding

# Our Commitment

## Valued Partnerships

Worldwide customers and suppliers in 20+ industries.

## Customer Focused

We are committed to being your full-service custom molding partner. It means making a commitment to go beyond injection molding to work with our customers as partners to enhance their productivity and profitability.

## Socially Responsible

Award-winning community involvement. Supporting/promoting educational programs. Our employees spread the CPC culture outside the walls of our facilities.

## Professional & Safe

At Commercial Plastics, Safety and professionalism is built on a simple principal; create a culture of safety so each employee goes home each day safe and injury free.

## CORE VALUES

## Environmentally Responsible

Reducing our environmental impact isn't the responsibility of a designated company department or even a cross-functional task force. It exists within each area and is a challenge placed squarely in front of each employee.
